stable doors

Style: **Stable Diamond**
Glass: **Minster**
Colour: **Red**

As well as the true aesthetics of a wooden door the design allows for the opening of the upper leaf. This provides light and ventilation whilst keeping the lower leaf closed to prevent children or animals leaving the home.

Constructed specifically with a mid-rail so that when cut through, it forms two leaves. Each leaf is completely surrounded by a rigid subframe providing both security and stability, as well as weather protection.

Often the solution to a back door from a kitchen. The Stable door can also be used as a front door.

Composite Four FD30 with Fanlight, Blue, Georgian Wire Cast

Composite Half FD30, Red, Georgian Wire Cast

Composite Half Moon FD30, Black, Georgian Wire Cast

Bohemia Mid Right, FD30, White, Georgian Wire Cast

Composite Six Two FD30, White, Georgian Wire Cast

Composite Six Two FD30, Green, Georgian Wire Cast

Composite Six Two FD30 Solid, Red

- FD30 & FD30s conform to BS476: Part 22:1987
- Fan light options available
- Hung in a specially adapted PVC-U frame
- Fire retardant letterplates and door viewers available
- Other fire resistant glass available

Fire doors are a legal requirement in certain applications. Contact us for further details.

energy efficiency

Our GRP composite door is more energy efficient than a traditional timber door or a solid timber core composite door - fact!

We all worry about how much energy our homes consume. The rising cost of our energy bills and our impact on the environment means we want to keep our consumption to a minimum. One of the best ways to do this is to choose thermally efficient products that keep warmth in and cold out, thereby saving money and emissions.

When it comes to thermally efficient doors, our GRP composite door is the best choice you can make.

Independent tests have proved that our GRP composite door is:

+19% more thermally efficient than a 48mm solid timber core composite door.

+17% more thermally efficient than a 44mm traditional timber panelled door.

The photos below show the thermal efficiency of each of the doors tested. The darker the blue, the less heat is being lost. Reds and greens, the predominant colours on the timber door indicate high heat loss.

Solid timber core composite door

Traditional timber panelled door

Our GRP composite door

The doors were tested at the University of Salford's Energy House. This is a typical Salford 1919 terraced house and its construction represents 21% of the UK's current housing stock. The house has been reconstructed in a fully environmentally controllable chamber, in which climatic conditions can be maintained, varied, repeated and patterns monitored. For the test, the inside temperature of the Energy House was 25C with an exterior temperature of 5C

Black Blue Green Red Purple

Fusion Jewel

Black/Beige Blue Green Red

Dorchester

Blue Green Amber

Hand-made by UK craftsmen to create the look of traditional stained glass windows, the Heritage Dorchester range is made from individual pieces of coloured and clear obscure glass cemented into lead grooves and protected between two sheets of clear toughened glass. The range is available in the following colours.

Backing Glass

Stippolyte

Minster

Cotswold

Autumn Leaf

Additional Backing glass options are available upon request but may incur an additional lead time and/or surcharge.

Caming Options

Zinc Brass

Our Platinum Clarity, Flores, Kara and Simplicity triple glazed designs are constructed using hand-cut bevels and beautifully textured glass pieces, which are assembled using traditional stained glass methods into zinc or brass cames. The decorative glass is then encapsulated between two pieces of clear tempered safety glass to give excellent thermal and sound insulation with the added benefit of an easy to clean, smooth surface.

Zinc Brass

Make it

Personal

Create your very own unique door with our personalised glass option. Using advanced technology known as direct digital glass printing (DDG), we can take any image you want and reproduce this directly onto your door glass. Now you really can make your own personal statement! This unique process is weather and fade resistant and fully guaranteed. Ask for more details!

Door furniture

Door handles

A choice of high quality handles, available as lever/lever or lever/pad featuring anti-snap security protection, are fitted as standard to all our Composite Doors.

Door knockers and letterplates

A whole range of door knockers and numerals are available in a variety of colour options. Spyholes, door guards and safety chains are also available for the Composite range.

Weatherbars

Gold and silver effect weatherbars are fitted as standard. However a range of weatherbars are available in a variety of colours to complement your chosen door.

Architectural hardware

Pull handles

Make your door stand out with our new range of contemporary door furniture, particularly suited to the Bohemia and cottage ranges.

Choose from various designs and styles that make a stylish, contemporary difference.

Each 'pull' handle design comes complete with a stainless steel knob to the interior with the option of our auto 'slam lock' system.

Auto 'slam lock' system

The automatic multi-point locking system operates as a slam lock and locks automatically as soon as the door is closed.

Closing the door behind you as you enter a dwelling gives full security and reduces the risk of anyone trying to enter immediately behind you.

Our automatic locking system comes as standard with all 'pull handle' furniture
